

Hello and Welcome

Before we can get started with your topic of the week we need to first clear up some important points 😊

1. Introduction Teacher
2. Get to know each other
3. Organisation and Materials
4. Timetable

Your Teacher

Your teacher will be guiding you through the topics in this seminar. Ask him anything you want to know.

Documentation

To make your life easy we have prepared all the documentation in advance. You just need to relax and partake in the seminar.

- You will be provided the content at the end of the seminar
- All documents, labs and resources will be in one single Git Repository

Feedback

As we can only learn if we know what we can do better, we always ask for feedback. Feel free to provide this when ever you want. Though 😊 we will be asking you at the end of the seminar anyway.

Ideas

We might have a agenda to go through... but this does not mean we can not improvise or adapt our agenda when needed. Feel free to through in ideas or topics that you want to know more about.

Participation

We need your support. Our seminar are split 70% on practical exercises that we can not do without you participating. Of course our teacher will be there to help you through any problems.

70% Practical Labs

30% Theory
